

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 1: Synthetic Student A

Sheet 1 of 2

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 1: Synthetic Student A

Sheet 2 of 2

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.

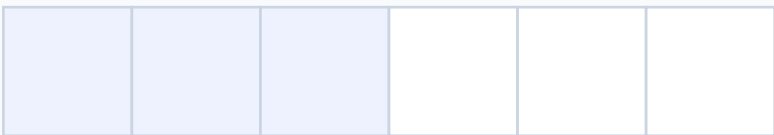

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 2: Synthetic Student B

Sheet 1 of 1

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.

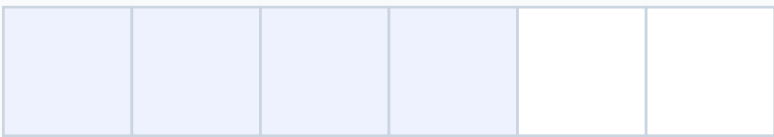

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 3: Synthetic Student C

Sheet 1 of 3

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.

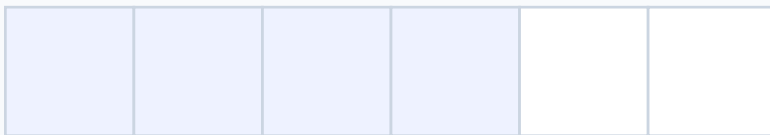

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 3: Synthetic Student C

Sheet 2 of 3

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.

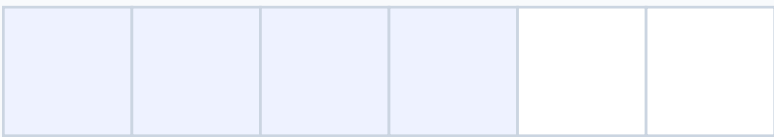

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 3: Synthetic Student C

Sheet 3 of 3

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.

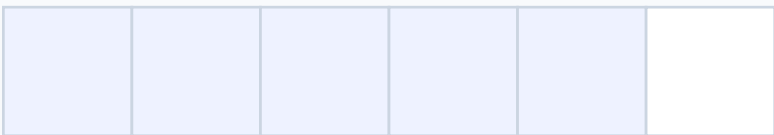

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 4: Synthetic Student D

Sheet 1 of 2

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.

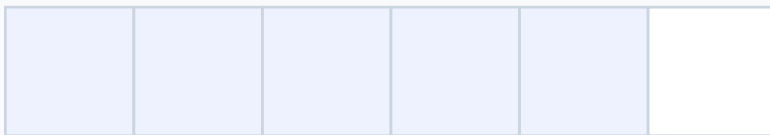

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 4: Synthetic Student D

Sheet 2 of 2

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 5: Synthetic Student E

Sheet 1 of 1

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 6: Synthetic Student F

Sheet 1 of 3

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 6: Synthetic Student F

Sheet 2 of 3

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.

Fractions and Explanations

Synthetic fixture for Issue 28 page-range inspection

Student 6: Synthetic Student F

Sheet 3 of 3

1. Shade a model that represents the fraction shown.

2. Explain how you know two fractions are equivalent.

3. Write one question you still have about fractions.
