

Fraction models: first observation

Observed timepoint: 2026-08-18

INPUT / observed-only structured response

Question: Show the fraction represented by the shaded model.

Observed response: two of four equal parts are shaded. Written representation: $\frac{2}{4}$.

Artifact: demo/trace-fraction-activity.pdf | source page: 1

ORIGINAL ARTIFACT / page 1

2 of 4 equal parts shaded

$\frac{2}{4}$

same two shaded parts

APPROVED PROCESS OUTPUT

Status: **APPROVED**

Evidence: the work sample shows two shaded parts out of four equal parts.

Review: teacher approved without edits.

PROVENANCE GATE

Evidence ID: synthetic-evidence-fraction-page-1

Analysis ID: synthetic-analysis-fraction-models-approved

Only APPROVED and EDITED_APPROVED analyses can reach output.

A separate REJECTED candidate remains excluded from this report.

Fraction equivalence: second observation

Observed timepoint: 2026-08-25

INPUT / observed-only structured response

Question: Compare two fraction representations with equal shaded area.

Observed response: four eighths are regrouped as two fourths. Written representation: $4/8 = 2/4$.

Artifact: demo/trace-fraction-activity.pdf | source page: 2

ORIGINAL ARTIFACT / page 2

4 of 8 equal parts shaded

$$4/8 = 2/4$$

equal area, grouped differently

TEACHER-EDITED APPROVAL

Status: **EDITED_APPROVED**

Before: Use an equivalent fraction next time.

After: Compare the equal shaded areas, then explain why four eighths can be regrouped as two fourths.

Teacher edit is retained as a visible delta.

APPROVED GROWTH EVENT

Growth event: related fraction representations across two observed work samples.

Linked evidence: synthetic-evidence-fraction-page-1 + synthetic-evidence-fraction-page-2

Status: **APPROVED** | **output-demo-v0.1** | **provisional synthetic contract**

Both source-page links are required before this growth event is shown.
